

Every Map Tells a Story

Use your classmate's map to answer the following questions by observing and collecting data:

1. Make a list of the objects/buildings in the map (observations).

2. How would you describe the place? (observations).

3. What activities take place in this location (inference).

4. Where is this site located? (inference).

5. What questions do you have about the map?

6. How could you get more information to answer your questions?
