

The Columbian Exchange

1. Fill in the blanks below with the plants native to each region.

New World	
North America	
Central America	
South America	
Old World	
Europe	
Africa	
Asia	

2. Look at the Lunch Menu and list ten plants from the day's lunch on the table below in the Plants column. Then fill in where these plants came from in the Place of Origin column.

Plant	Place of Origin

3. Place a star or X on the World Map indicating the place of origin for each plant listed.

4. List four observations that can be made from this data:

5. List three inferences that can be made from your observations:

6. What does this data say about the origin of this school lunch?
